## EXPERIENCE

### Systems Developer – Lund Municipality

Dec 2025 – Present

- Develops and maintains backend systems for data processing and system integration
- Builds ETL flows for collection, validation and normalization of structured data
- Transforms data using XML, JSON and XSLT across multiple data flows
- Implements web crawlers with logging, retry logic and rate limiting
- Delivers compiled GUI-based tools to support internal data-handling processes

## PROJECTS

### Meeting Aggregation Platform (nameetings.cloud)

- Designed and built an ETL pipeline that processes data from 40+ global sources
- Implemented workflows for collection, validation, normalization and transformation
- Integrated multiple APIs and standardized heterogeneous data formats
- Developed an admin system with full CRUD functionality for data management

## EDUCATION

- Full Stack Development – Code Institute (2022–2024)
- .NET Developer – Lexicon Malmö (2023)
- Pedagogy – University College Kolding (2012–2016)

## PREVIOUS EXPERIENCE

- Preschool Teacher – Landskrona Municipality
- Preschool Teacher – Malmö Municipality

2018–2022

2016–2018
